## DSM-IV-TR Casebook, Volume 2: Experts Tell How They Treated Their Own Patients

The groundbreaking *DSM-IV-TR® Casebook, Volume 2: Experts Tell How They Treated Their Own Patients* is unique among casebooks because—unlike other casebooks (including the editors' own previous casebook), which include descriptions of cases from clinical practice, discussions of the differential diagnosis, and suggested treatments—it features experts who go beyond the standard case description by detailing their own treatment approaches in interesting cases from their own practices. A must-have for every mental health care student, educator, and professional, this fascinating casebook features

- A remarkable 53 expert contributors, selected with great care by the editors to ensure that their case studies span the full range of psychological, psychosocial, and pharmacological treatment approaches.
- An unprecedented 33 case studies divided into 14 sections, with topics ranging from illnesses first diagnosed in infancy, childhood, or adolescence—including an illuminating study of childhood bipolar disorder—to illnesses of old age, such as delirium and dementia.
- Unparalleled depth of detail, in that every case study includes a summary of the patient's presenting symptoms, problems, history of present illness and past history, the expert's differential diagnosis and reasons for choosing a particular therapy, their initial treatment goals, how they explained the treatment to the patient and the patient's reaction, what actually went on in the sessions, the expert's thoughts and feelings during the treatment process, and how the patient changed over time.
- An unmatched range of topics, including case studies of mental disorders due to a general medical condition, substance abuse disorders, schizophrenia and other psychotic disorders, mood and anxiety disorders, somatoform and factitious disorders, dissociative disorders, sexual and gender identity disorders, eating disorders, and impulse-control and personality disorders.
- A logical structure that promotes ease of use in that these all-new case studies are presented in the order in which the diagnoses appear in the DSM-IV-TR classification; cases can be located by diagnosis, treatment modality, case name, or clinician.

*DSM-IV-TR® Casebook, Volume 2: Experts Tell How They Treated Their Own Patients* is simply the essential casebook for mental health care students, residents, educators, professionals, and interested laypersons everywhere.
