This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1829 Excerpt: ...1.25, 1.25 and 1.25=3 differences. Whence $\frac{1}{3.75} \times 1.25 \times 1.25 \times 1.25 = \frac{1}{3.75} \times 17253 = 7.32421875 = 2.7063 =$ area of the base as before, And $2.7063 \times 10 = 27.063$ solid feet, the content of the prism required, 2. What is the solidity of a triangular prism, whose length is 18 feet, and one side of the equilateral end 18 feet? Ans. 17.5370265 feet. 3. Required the solidity of a prism whose base is a hexagon, supposing each of the equal sides to be 1 foot 4 inches, and the length of the prism 15 feet. Ans. 69.282ft. PROBLEM IV. To find the convex surface of a cylinder. RULE. Multiply the periphery or circumference of the base, by the height of the cylinder, and the product will be the convex surface required.. EXAMPLES. 1. What is the convex surface of the right cylinder ABCD, whose length BC is 20 feet, and the diameter of its base AB 2 feet 1 See Notes to Prob. III. Cor. ft. p. 56. t Demon. If the periphery of the base be conceived to move in a direction parallel to itself, it will generate the convex superficies of the cylinder, and, therefore, the said periphery being multiplied by the length of the cylinder, will be equal to that superficies. Q. E. D. Note. If twice the area of either of the ends be added to the convex surface, it will give the whole surface of the cylinder. Here $3.1416 \times 2 = 6.2832 =$ periphery of the base AB. And $6.2832 \times 20 = 125.6640$ square feet, the convexity required. 2. What is the convex surface of a right cylinder, the diameter of whose base is 30 inches, and the length 60 inches 1 Ans. 5654.88 inches. 3. Required the convex superficies of a right cylinder, whose circumference is 8 feet 4 inches, and its length 14 feet, Ans. 116.666, dft. feet. PROBLEM V. To find the solidity of a cylinder. RULE. Multiply the area of the base by the perpendicular height...

From reader reviews:

Deborah Rinehart:

The book An introduction to mensuration and practical geometry make one feel enjoy for your spare time. You may use to make your capable much more increase. Book can to become your best friend when you getting stress or having big problem with the subject. If you can make reading a book An introduction to mensuration and practical geometry to be your habit, you can get a lot more advantages, like add your capable, increase your knowledge about a few or all subjects. It is possible to know everything if you like wide open and read a guide An introduction to mensuration and practical geometry. Kinds of book are a lot of. It means that, science book or encyclopedia or other folks. So , how do you think about this publication?

Elizabeth Bello:

Information is provisions for those to get better life, information these days can get by anyone on everywhere. The information can be a understanding or any news even restricted. What people must be consider whenever those information which is inside the former life are hard to be find than now is taking seriously which one is appropriate to believe or which one the resource are convinced. If you obtain the unstable resource then you get it as your main information we will see huge disadvantage for you. All of those possibilities will not happen with you if you take An introduction to mensuration and practical geometry as your daily resource information.

Lorenzo Davis:

Playing with family in a park, coming to see the water world or hanging out with close friends is thing that usually you may have done when you have spare time, then why you don't try point that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love An introduction to mensuration and practical geometry, you may enjoy both. It is fine combination right, you still desire to miss it? What kind of hang-out type is it? Oh seriously its mind hangout men. What? Still don't have it, oh come on its identified as reading friends.

Daphne Jones:

On this era which is the greater man or woman or who has ability in doing something more are more valuable than other. Do you want to become one of it? It is just simple way to have that. What you are related is just spending your time not very much but quite enough to get a look at some books. One of many books in the top record in your reading list is usually An introduction to mensuration and practical geometry. This book which can be qualified as The Hungry Slopes can get you closer in turning into precious person. By looking way up and review this reserve you can get many advantages.
