Introduction to the Foundations of Applied Mathematics (Texts in Applied Mathematics) Mark H. Holmes

FOAM. This acronym has been used for over 50 years at Rensselaer to designate an upper-division course entitled, Foundations of Applied Mathematics. This course was started by George Handelman in 1956, when he came to Rensselaer from the Carnegie Institute of Technology. His objective was to closely integrate mathematical and physical reasoning, and in the process enable students to obtain a qualitative understanding of the world we live in. FOAM was soon taken over by a young faculty member, Lee Segel. About this time a similar course, Introduction to Applied Mathematics, was introduced by Chia-Ch'iao Lin at the Massachusetts Institute of Technology. Together Lin and Segel, with help from Handelman, produced one of the landmark textbooks in applied mathematics, Mathematics Applied to Deterministic Problems in the Natural Sciences. This was originally published in 1974, and republished in 1988 by the Society for Industrial and Applied Mathematics, in their Classics Series. This textbook comes from the author teaching FOAM over the last few years. In this sense, it is an updated version of the Lin and Segel textbook.

From reader reviews:

Trevor Wright:

Reading a book to get new life style in this yr; every people loves to study a book. When you learn a book you can get a lot of benefit. When you read guides, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your review, you can read education books, but if you act like you want to entertain yourself read a fiction books, these us novel, comics, and also soon. The Introduction to the Foundations of Applied Mathematics (Texts in Applied Mathematics) will give you new experience in studying a book.

Carol Anthony:

You may get this Introduction to the Foundations of Applied Mathematics (Texts in Applied Mathematics) by go to the bookstore or Mall. Just viewing or reviewing it might to be your solve difficulty if you get difficulties for ones knowledge. Kinds of this guide are various. Not only by simply written or printed and also can you enjoy this book by means of e-book. In the modern era such as now, you just looking by your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose suitable ways for you.

Edward Cottrell:

That publication can make you to feel relax. This book Introduction to the Foundations of Applied Mathematics (Texts in Applied Mathematics) was vibrant and of course has pictures around. As we know that book Introduction to the Foundations of Applied Mathematics (Texts in Applied Mathematics) has many kinds or type. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and feel that you are the character on there. Therefore not at all of book tend to be make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book for you and try to like reading that will.

Gail Blakely:

As a university student exactly feel bored to be able to reading. If their teacher questioned them to go to the library as well as to make summary for some publication, they are complained. Just small students that has reading's internal or real their hobby. They just do what the trainer want, like asked to the library. They go to there but nothing reading seriously. Any students feel that studying is not important, boring along with can't see colorful photos on there. Yeah, it is being complicated. Book is very important for you. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Introduction to the Foundations of Applied Mathematics (Texts in Applied Mathematics) can make you really feel more interested to read.
