Republic F-105 Thunderchief (Air Vanguard) Peter Davies

The Republic F-105 was the fastest and most successful Cold War strike fighter. Designed to deliver nuclear weapons at low altitude and then fight its way back to base it was the primary weapon in the USAF's world-wide tactical strike arsenal in the early 1960s. Thunderchief pilots in Europe, the Far East and the USA stood on short-notice alert, ready to take on formidable defences in their supersonic attacks on pre-planned Communist bloc targets. However, the F-105 achieved legendary status in a very different conflict.

When direct American involvement in Vietnam began in 1964 F-105s were deployed to the area, initially as a deterrent but increasingly as conventional attack fighters against insurgency in Laos and Vietnam. As the pace of war increased and bombing of North Vietnam began in 1965 the Thunderchief was the most important weapon in attacks against the most heavily defended territory in modern history. Two wings of F-105s, manned by pilots whose experience often included combat in WWII and Korea, performed truly heroic deeds in an environment where the political and tactical odds were usually stacked against them. Flying long distances from their bases in Thailand the fighters maintained daily attacks on military, transport and industrial targets, braving deadly Soviet anti-aircraft missiles and flak 'thick enough to walk on' (in the words of one pilot). Additionally, they shot down at least 27 North Vietnamese MiG fighters in eighteen months, more than half the total scored by the official F-4 Phantom II anti-MiG escorts in that period. However, the cost was unacceptably high: 330 out of a total production of 753 F-105Ds and two-seat F-105Fs were lost in combat, curtailing the type's front-line service. The two-seat F-105F, initially produced as a trainer, became a vital pioneer in the field of electronic warfare. Specially-equipped examples used new technology to detect and defeat Soviet radar guided missiles and anti-aircraft guns introducing revolutionary tactics in SEAD (suppression of enemy air defences) which are still in use today. They provided essential support to the Linebacker operations that ended the war in 1972 and continued in service after the surviving single-seat F-105s had been relegated to reserve duties.

Historically and technically the F-105 epitomises the 'faster and higher' design philosophy of 1950s aircraft technology. Its designer, Alexander Kartveli, was responsible for the WW II P-47 Thunderbolt and a series of F-84 fighter designs that gave the USAF its first credible jet striker for the Korean War and the basis of its tactical nuclear strike capability in the 1950s. The F-105 marked the climax of this design process, creating a fighter which could out-run any MiG at low altitude and project US air power at long range in ways that defeated the most sophisticated air defences.

Visually, the F-105 was an impressively large and dramatic-looking fighter. In combat service it acquired a wide range of colour schemes (including that of the Thunderbirds aerobatic team) and wartime artwork that lead to attractive illustrative material. Despite its undoubted importance, popularity and its legendary combat record the type has attracted comparatively slight attention from publishers and nothing (at least, since the 1960s Profile Publications) that presents its full story in the compact but thorough form that an Air Vanguard could offer to a wide range of enthusiasts and students.

From reader reviews:

Judith Lucas:

This Republic F-105 Thunderchief (Air Vanguard) usually are reliable for you who want to certainly be a successful person, why. The reason of this Republic F-105 Thunderchief (Air Vanguard) can be among the great books you must have is definitely giving you more than just simple reading food but feed anyone with information that might be will shock your prior knowledge. This book is handy, you can bring it almost everywhere and whenever your conditions throughout the e-book and printed versions. Beside that this Republic F-105 Thunderchief (Air Vanguard) giving you an enormous of experience for instance rich vocabulary, giving you trial of critical thinking that we understand it useful in your day activity. So , let's have it and enjoy reading.

Joseph Nixon:

People live in this new time of lifestyle always try and and must have the free time or they will get lot of stress from both day to day life and work. So , once we ask do people have time, we will say absolutely of course. People is human not really a robot. Then we ask again, what kind of activity do you have when the spare time coming to you of course your answer will probably unlimited right. Then do you try this one, reading guides. It can be your alternative in spending your spare time, often the book you have read will be Republic F-105 Thunderchief (Air Vanguard).

Matthew Sewell:

Reading can called head hangout, why? Because if you are reading a book mainly book entitled Republic F-105 Thunderchief (Air Vanguard) your thoughts will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely will become your mind friends. Imaging every single word written in a reserve then become one contact form conclusion and explanation that maybe you never get just before. The Republic F-105 Thunderchief (Air Vanguard) giving you one more experience more than blown away the mind but also giving you useful info for your better life within this era. So now let us demonstrate the relaxing pattern this is your body and mind will likely be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary wasting spare time activity?

John Stevenson:

Would you one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try and pick one book that you just dont know the inside because don't judge book by its protect may doesn't work here is difficult job because you are afraid that the inside maybe not while fantastic as in the outside search likes. Maybe you answer may be Republic F-105 Thunderchief (Air Vanguard) why because the amazing cover that make you consider about the content will not disappoint a person. The inside or content is definitely fantastic as the outside as well as cover. Your reading 6th sense will directly make suggestions to pick up this book.
