Text World Theory: An Introduction Joanna Gavins

Text World Theory is a cognitive model of all human discourse processing. In this introductory textbook, Joanna Gavins sets out a usable framework for understanding mental representations. Text World Theory is explained using naturally occurring texts and real situations, including literary works, advertising discourse, the language of lonely hearts, horoscopes, route directions, cookery books and song lyrics. The book will therefore enable students, teachers and researchers to make practical use of the text-world framework in a wide range of linguistic and literary contexts.
