The River Runs Black: The Environmental Challenge to Chinas Future (Chinese Edition) Yi Ming

Chinas spectacular economic growth over the past two decades has dramatically depleted the countrys natural resources and produced skyrocketing rates of pollution. Environmental degradation in China has also contributed to significant public health problems, mass migration, economic loss, and social unrest. In *The River Runs Black*, Elizabeth C. Economy examines Chinas growing environmental crisis and its implications for the countrys future development. Drawing on historical research, case studies, and interviews with officials, scholars, and activists in China, Economy traces the economic and political roots of Chinas environmental challenge and the evolution of the leaderships response. She argues that Chinas current approach to environmental protection mirrors the one embraced for economic development: devolving authority to local officials, opening the door to private actors, and inviting participation from the international community, while retaining only weak central control.
