Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation)

Kai Zuber

Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) Kai Zuber

Neutrino physics remains one of the most exciting fields of fundamental physics today. The neutrino's position at the intersection of particle physics, astrophysics, and nuclear physics ensures continuing interest in the subject. Major activities at accelerators like Fermilab, KEK and CERN, in addition to underground facilities like Gran Sasso, Kamioka and Sudbury, continue to enhance our understanding of the origins and properties of neutrinos, and their implications for the Standard Model and cosmology.

Neutrino Physics provides an up to date and comprehensive introduction to the subject as well as an invaluable resource for researchers in physics and astrophysics. Starting with a brief historical overview the author proceeds to review fundamental neutrino properties, the neutrino mass question, and their place within and beyond the Standard Model. The final chapters examine the role of neutrinos in modern astroparticle physics, cosmology and the dark matter problem. The book concludes with a summary of the current status of neutrino physics and the implications of recent results.

Written to be accessible to readers from different backgrounds in nuclear, particle or astrophysics and with a detailed reference list, this title will be essential for any researcher or advanced student who needs to understand modern neutrino physics.

From reader reviews:

Lana Alvis:

As people who live in the modest era should be update about what going on or data even knowledge to make all of them keep up with the era which can be always change and make progress. Some of you maybe will update themselves by examining books. It is a good choice to suit your needs but the problems coming to an individual is you don't know which you should start with. This Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and wish in this era.

Margaret Jackson:

The guide untitled Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) is the book that recommended to you to learn. You can see the quality of the reserve content that will be shown to a person. The language that author use to explained their ideas are easily to understand. The article author was did a lot of study when write the book, so the information that they share to you is absolutely accurate. You also can get the e-book of Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) from the publisher to make you a lot more enjoy free time.

Lillie Rose:

Typically the book Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) has a lot associated with on it. So when you read this book you can get a lot of advantage. The book was compiled by the very famous author. The author makes some research just before write this book. This kind of book very easy to read you can get the point easily after perusing this book.

Robert Hansen:

The book untitled Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) contain a lot of information on the item. The writer explains your girlfriend idea with easy means. The language is very simple to implement all the people, so do definitely not worry, you can easy to read this. The book was compiled by famous author. The author provides you in the new period of time of literary works. You can read this book because you can continue reading your smart phone, or product, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can wide open their official web-site as well as order it. Have a nice go through.
