Stroke Rehabilitation: A Function-Based Approach, 4e Glen Gillen

Learn to confidently manage the growing number of stroke rehabilitation clients with Gillen's **Stroke Rehabilitation: A Function-Based Approach, 4th Edition**. Using a holistic and multidisciplinary approach, this text remains the *only* comprehensive, evidence-based stroke rehabilitation resource for occupational therapists. The new edition has been extensively updated with the latest information, along with more evidence-based research added to every chapter. As with previous editions, this comprehensive reference uses an application-based method that integrates background medical information, samples of functionally based evaluations, and current treatment techniques and intervention strategies.

- **Evidence-based clinical trials and outcome studies** clearly outline the basis for stroke interventions.
- **UNIQUE! *Survivor's Perspectives* help readers understand the stroke rehabilitation process from the client's point-of-view.**
- **UNIQUE! Case studies** challenge readers to apply rehabilitation concepts to realistic scenarios.
- **UNIQUE! A multidisciplinary approach** highlights discipline-specific distinctions in stroke rehabilitation among occupation and physical therapists, physicians, and speech-language pathologists.
- **Review questions in each chapter** help readers assess their understanding of rehabilitation concepts.
- **Key terms and chapter objectives** at the beginning of each chapter help readers study more efficiently.
- **Three new chapters** broaden your understanding of stroke intervention in the areas of *Using Technology to Improve Limb Function*, *Managing Speech and Language Deficits after Stroke*, and *Parenting after Stroke*.
- **Learning activities and interactive references on a companion Evolve Resources website** help you review textbook content and locate additional information.
