Paul E. Hardisty, Ece Ozdemiroglu

The Economics of Groundwater Remediation and Protection (Integrative Studies in Water Management & Land Deve) Paul E. Hardisty, Ece Ozdemiroglu

Economic literature is often too theoretical for engineers and policymakers to put into practical use, while scientific literature on the remediation of contaminated aquifers rarely considers costs and benefits. Written by a hydrogeologist and an economist, *The Economics of Groundwater Remediation and Protection* integrates economics and cost-benefit analysis tools with optimal protection and remediation strategies for groundwater resources.

The book provides a thorough introduction of the concepts of groundwater flow and contaminant transport, and the basics of economic decision making techniques. It illustrates the types of risks and impacts caused by groundwater contamination, and the economic benefits of its remediation. The volume reviews a wide range of issues such as cost, implementation, and expectations of success for the latest remediation trends and techniques. The book shows how economic analysis can be used to determine how much we should pay for groundwater clean-up, and when spending too much - or too little - actually makes us all worse-off. The authors' step-by-step methodology for decision-making focuses on determining optimal remedial objectives, from containment to extensive cleanup, and the selection of least-cost alternatives. They use examples from their personal experience to illustrate the methodologies in action and put the issues into perspective.

Combining the theoretical and practical aspects of science, policy, and economics, this book places the importance of groundwater remediation in the context of environmental economics, protection, and preservation. *The Economics of Groundwater Remediation and Protection* is also an excellent introduction to innovative solutions for funding remediation projects, education, and incentive programs, such as mitigation banking, land pollution credit schemes, and conservation credit alternatives.

From reader reviews:

Janet Magnuson:

Nowadays reading books are more than want or need but also work as a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge your information inside the book in which improve your knowledge and information. The info you get based on what kind of book you read, if you want have more knowledge just go with training books but if you want feel happy read one with theme for entertaining like comic or novel. The actual The Economics of Groundwater Remediation and Protection (Integrative Studies in Water Management & Land Deve) is kind of publication which is giving the reader unpredictable experience.

Brian Bottoms:

Spent a free time to be fun activity to complete! A lot of people spent their down time with their family, or their own friends. Usually they doing activity like watching television, likely to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? Could be reading a book is usually option to fill your free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the publication untitled The Economics of Groundwater Remediation and Protection (Integrative Studies in Water Management & Land Deve) can be fine book to read. May be it could be best activity to you.

Joshua Bush:

Your reading sixth sense will not betray you actually, why because this The Economics of Groundwater Remediation and Protection (Integrative Studies in Water Management & Land Deve) reserve written by well-known writer who really knows well how to make book which can be understand by anyone who also read the book. Written in good manner for you, dripping every ideas and creating skill only for eliminate your personal hunger then you still skepticism The Economics of Groundwater Remediation and Protection (Integrative Studies in Water Management & Land Deve) as good book but not only by the cover but also from the content. This is one publication that can break don't assess book by its deal with, so do you still needing another sixth sense to pick this specific!? Oh come on your studying sixth sense already said so why you have to listening to yet another sixth sense.

Laura Ide:

As a university student exactly feel bored in order to reading. If their teacher expected them to go to the library or to make summary for some publication, they are complained. Just little students that has reading's heart or real their passion. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that reading is not important, boring and also can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's

country. Therefore this The Economics of Groundwater Remediation and Protection (Integrative Studies in Water Management & Land Deve) can make you sense more interested to read.
