Research Handbook on International Marine Environmental Law (Research Handbooks in Environmental Law series) Rosemary Rayfuse

'Written by eminent scholars and practitioners, this Handbook is an accessible treasure trove for diplomats as well as advocates, advanced scholars and law students, indeed anyone interested in the future of our oceans. I predict it will become an essential guidebook for all those involved in international ocean negotiations.'

- Kristina Gjerde, High Seas Policy Advisor, IUCN

'For diplomats, practitioners, and scholars concerned with the myriad threats facing our oceans, the Elgar Research Handbook on International Marine Environmental Law is a must. It contains enlightening analysis of the complex ocean governance problems that imperil the marine environment and continue to evade solution. More importantly, it advances realistic ideas to move the environmental protection of our oceans forward. All of this from some of the sharpest thinkers on these issues today.'

- Donald K. Anton, Griffith University, Australia

This authoritative *Handbook* examines the current state of and the future challenges for international law in addressing the key activities that pose threats to the marine environment. It provides a critical analysis of, and constructive solutions for, the international legal regime for the protection of the marine environment and identifies areas of vital research need for the future.

The in-depth chapters, written by emerging and established experts in their fields, explore the legal framework for protection of the marine environment and look at issues such as pollution, seabed activities, and climate change as well as discussing the protection of marine biodiversity and considering regional approaches to the protection of the marine environment. Each chapter goes beyond a survey of existing law to identify the shortcomings in the legal regime and areas of critical research needed to address these shortcomings. This timely book provides significant insights into contemporary issues surrounding the efficacy of the regime created by the 1982 Law of the Sea Convention and details the further work needed to ensure the design and implementation of effective regulation and management of human activities that affect the marine environment.

Students and academics researching in the law of the sea and environmental law will find the *Handbook* central to their subject areas. The analyses and reform proposals are an invaluable resource for government and policy practitioners, as well as IGOs and NGOs involved in marine environmental issues.

Contributors: M. Bourrel, R. Churchill, E. Druel, J. Harrison, T. Henriksen, K. Houghton, A.M. Hubert, N. Liu, M. Lodge, J. Mossop, N. Oral, D. Osborn, A. Proelss, H. Ringbom, J. Rochette, K.N. Scott, T. Stephens, Y. Tanaka, D. Tladi, D.L. VanderZwaag, D. Vousden, H.D. Vu, R. Warner, G. Wright
