## Standard Methods for the Examination of Water and Wastewater

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 Excerpt: ... equal to the content of sulfate (S04). SODIUM, POTASSIUM, AND LITHIUM. Evaporate to dryness the filtrate from the precipitation of barium sulfate. Add a few cubic centimeters of hot water and then a saturated solution of barium hydroxide until a slight film collects on the top of the solution. Filter and wash the precipitate with hot water. Add to the filtrate an excess of ammonium hydroxide and ammonium carbonate solution. Filter, evaporate the filtrate to dryness, dry, and ignite at low red heat to expel ammonium salts. Repeat the operations including the addition of barium hydroxide until no precipitate is obtained by barium hydroxide or by ammonium hydroxide and ammonium carbonate. Evaporate the final filtrate to dryness in a weighed platinum dish, dry, cool, Potassium 59 and weigh the residue. Dissolve the residue in a few cubic centimeters of water, filter, wash the filter paper twice with hot water, then ignite the filter paper in the platinum dish. Cool and weigh the residue. Subtract this weight from the first weight including the residue. The difference is the weight of the chlorides of sodium and potassium and lithium. If it is not desired to separate sodium and potassium the weight of sodium and potassium as sodium may be calculated from this difference by multiplying it by 0.394. POTASSIUM. First procedure.--Add to the solution of the chlorides of sodium and potassium a few drops of dilute hydrochloric acid (1 to 3) and 1 cc. of 10 per cent platinic chloride (PtCU) for each 30 mg. of the combined chlorides. Evaporate to a thick syrup on the water bath, then remove dish and allow it to come to dryness at laboratory temperature. Treat the residue cold with 80 per cent alcohol and filter. Wash the precipitate with 80 per cent alcohol until the ni...

### From reader reviews:

#### **Sharon Bedgood:**

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to know everything in the world. Each book has different aim or goal; it means that publication has different type. Some people sense enjoy to spend their a chance to read a book. They can be reading whatever they take because their hobby will be reading a book. Consider the person who don't like reading a book? Sometime, individual feel need book once they found difficult problem or exercise. Well, probably you will require this Standard Methods for the Examination of Water and Wastewater.

#### **Mark Gibson:**

What do you about book? It is not important along? Or just adding material if you want something to explain what your own problem? How about your time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Everyone has many questions above. They need to answer that question due to the fact just their can do that will. It said that about book. Book is familiar in each person. Yes, it is proper. Because start from on jardín de infancia until university need this Standard Methods for the Examination of Water and Wastewater to read.

#### **Doris Brown:**

This Standard Methods for the Examination of Water and Wastewater is great publication for you because the content which can be full of information for you who else always deal with world and have to make decision every minute. This particular book reveal it facts accurately using great organize word or we can point out no rambling sentences inside it. So if you are read the idea hurriedly you can have whole details in it. Doesn't mean it only will give you straight forward sentences but tricky core information with attractive delivering sentences. Having Standard Methods for the Examination of Water and Wastewater in your hand like having the world in your arm, details in it is not ridiculous just one. We can say that no e-book that offer you world inside ten or fifteen tiny right but this book already do that. So , this can be good reading book. Hi Mr. and Mrs. active do you still doubt in which?

#### **Arthur Mead:**

As a student exactly feel bored in order to reading. If their teacher inquired them to go to the library or even make summary for some publication, they are complained. Just very little students that has reading's soul or real their interest. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that looking at is not important, boring and also can't see colorful pics on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Standard Methods for the Examination of Water and Wastewater can make you feel more interested to read.
