The Statistical Analysis of Experimental Data (Dover Books on Mathematics)

John Mandel

The Statistical Analysis of Experimental Data (Dover Books on Mathematics) John Mandel

The increasing importance in laboratory situations of minutely precise measurements presents the chemist and physicist with numerous problems in data analysis. National Bureau of Standards statistics consultant John Mandel here draws a clear and fascinating blueprint for a systematic science of statistical analysis — geared to the particular needs of the physical scientist, with approach and examples aimed specifically at the statistical problems he is likely to confront.

The first third of *The Statistical Analysis of Experimental Data* comprises a thorough grounding in the fundamental mathematical definitions, concepts, and facts underlying modern statistical theory — math knowledge beyond basic algebra, calculus, and analytic geometry is not required. Remaining chapters deal with statistics as an interpretative tool that can enable the laboratory researcher to determine his most effective methodology. You'll find lucid, concise coverage of over 130 topics, including elements of measurement; nature of statistical analysis; design/analysis of experiments; statistics as diagnostic tool; precision and accuracy; testing statistical models; between-within classifications; two-way classifications; sampling (principles, objectives, methods); fitting of non-linear models; measurement of processes; components of variance; nested designs; the sensitivity ratio, and much more.

Also included are many examples, each worked in step-by-step fashion; nearly 200 helpful figures and tables; and concluding chapter summaries followed by references for further study.

Mandel argues that, when backed by an understanding of its theoretic framework, statistics offers researchers "not only a powerful tool for the interpretation of experiments but also a task of real intellectual gratification." *The Statistical Analysis of Experimental Data* provides the physical scientist with the explanations and models he requires to impress this invaluable tool into service.

From reader reviews:

Eleanor Hayes:

Do you have favorite book? In case you have, what is your favorite's book? Reserve is very important thing for us to be aware of everything in the world. Each publication has different aim or perhaps goal; it means that reserve has different type. Some people sense enjoy to spend their a chance to read a book. They are really reading whatever they consider because their hobby is usually reading a book. Think about the person who don't like reading through a book? Sometime, man or woman feel need book if they found difficult problem as well as exercise. Well, probably you will need this The Statistical Analysis of Experimental Data (Dover Books on Mathematics).

Edward McClung:

Throughout other case, little people like to read book The Statistical Analysis of Experimental Data (Dover Books on Mathematics). You can choose the best book if you like reading a book. Given that we know about how is important a new book The Statistical Analysis of Experimental Data (Dover Books on Mathematics). You can add knowledge and of course you can around the world by just a book. Absolutely right, simply because from book you can recognize everything! From your country till foreign or abroad you will find yourself known. About simple matter until wonderful thing you may know that. In this era, we can easily open a book or even searching by internet system. It is called e-book. You should use it when you feel uninterested to go to the library. Let's go through.

John Tamaro:

People live in this new moment of lifestyle always try to and must have the extra time or they will get lots of stress from both lifestyle and work. So , whenever we ask do people have extra time, we will say absolutely sure. People is human not really a huge robot. Then we consult again, what kind of activity are there when the spare time coming to an individual of course your answer will certainly unlimited right. Then do you try this one, reading publications. It can be your alternative throughout spending your spare time, the particular book you have read is definitely The Statistical Analysis of Experimental Data (Dover Books on Mathematics).

Dorothy Betancourt:

Do you have something that that suits you such as book? The publication lovers usually prefer to choose book like comic, quick story and the biggest an example may be novel. Now, why not seeking The Statistical Analysis of Experimental Data (Dover Books on Mathematics) that give your fun preference will be satisfied simply by reading this book. Reading routine all over the world can be said as the way for people to know world better then how they react toward the world. It can't be said constantly that reading routine only for the geeky particular person but for all of you who wants to possibly be success person. So , for all you who want to start reading through as your good habit, you may pick The Statistical Analysis of Experimental Data

(Dover Books on Mathematics) become your own personal starter.
